ELECTRONICS DIVISION

## ADVANCED RADAR WARNING RECEIVER

### ELIMINATE UNCERTAINTY - REACT AND SURVIVE

SEER is a modular, high performance Radar Warning Receiver (RWR) providing sophisticated protection from radar threats. Through the early detection of RF signals emitted from active radar systems, SEER allows a platform to evade a threat using appropriate countermeasures and manoeuvres.

Available in E-J, C-D, E-K configurations, SEER is compatible with multi-mission displays and is easily installed onto a wide range of airborne platforms.

SEER reduces a pilot's workload by efficiently identifying, categorising, discriminating and reporting radar threats. This ensures that correct countermeasures can be deployed and pilot and platform safety is increased.

### KEY FEATURES

- › Lightweight
- › Low power requirement
- › Scalable configurations
- › Suitable for all platforms
- › Long range detection
- › Wide frequency coverage
- › Excellent parameter measurements in dense RF environments
- › Simple integration

### OPERATIONAL BENEFITS

- › SEER is proven, mature, in service and easy to integrate
- › Suitable for new builds or retrofits
- › Cost effective means of overcoming an RF platform deficit
- › Improved situational awareness
- › Provides timely and efficient Countermeasure (CM) selection
- › Easy to program with EWOS tools

### ELECTRONIC WARFARE OPERATIONAL SUPPORT (EWOS)

Give your platform the best possible protection with EWOS. Our world class provision includes:

- › Threat Vulnerability Analysis and Countermeasure Development (TVACD)
- › Comprehensive training packages
- › Simple programming
- › Data and configuration management tools
- › Sovereign capability development
